

ENGINEERING CHALLENGE CUP 2020

Bulletin 09 ECC2020 Call for Sponsors

Status update

After the seasons holiday we want to wish you all a good start of 2020.

We are wrapping up the status of our event organisation, as May is coming sooner than expected. We like to share that we are working on the **Sailing Instructions** for the racing details and we are making a **Pilot**, this will include information about the harbours and social events.

A new item will be a special dedicated Event APP for the ECC, including a manual how to get started and use this APP. All documents/content will be downloadable via our website and we strive it to have them available in the APP as well.

This APP will also replace the printed **Logbook** to which we were so familiar. Maybe it is a pity not have one for 2020, but the logbook was a very costly item in the budget and an APP is more what we should expect in 2020 in a digital world. Each participant can make use of the APP.

All chapters/parts, that were in the previous **Logbook**, will be available as a PDF file for you to download and print it out yourself.

Skippers Checklist, to do's towards us as OC:

Crewlist ready and complement. It is highly important to use the format available on the website under:

<https://eccsailing.files.wordpress.com/2019/06/2020-ecc-crew-list-master.xlsx>

Please not to change anything to it, as we have to compile all files into one file.

The crewlist will be used for the harbour authorities making our entry etc. a lot easier.

The list will also be used to order crew-polos, we need to place our PO this month in order to get it organised in time.

The list is part of our safety protocol in case of emergencies as well, so please take care that all information is correct.

Crew presentations are totally voluntary. The new APP will have a possibility to present each crewmember and will have possibilities to communicate with each other, so it will be an interactive tool. If you sent us an A4 in PDF-format with your boat number and your crew photo, we will put all the received pages into one Crew presentation document.

ENGINEERING CHALLENGE CUP 2020

Sponsoring, our biggest concern is our financial situation and we kindly urge all of you to take action to get some sponsoring in for our event. Also please check with your crew. Any news, if we may welcome additional contribution's, is more than welcome! In the meantime we have sent-out an email to each skipper and already got some very positive reactions. Many thanks for that!!
