28th Engineering Challenge Cup 2023

ECC 2023 – Bulletin 6

20th December 2022

Boat Selection completed, boats still available

Dear Skippers,

We are happy to announce that the boat selection process was completed on December the 14th 2022 with 44 confirmed skippers. Some of them have also added either a week or a few days of to enjoy the region and take their boat to **San Vito Lo Capo**, the starting location, or take it back to the base harbour from **Marsala** at the end of the week. [Here](#) you can find the list of the skipper and the boat they have chosen.

Sadly 3 of announced skippers and their crews had to cancel their participation, so **some boats are still available**. Please, forward the information to your contacts that **any skipper** with any connection to the engineering field **are still able to join the ECC 2023!**

Crew List

A full list of participants will enable us to establish at best the numbers for catering, polo shirts, medals, etc. We would appreciate if each skipper can collect all the information to complete **the crew list and send it to ecc2023.commodore@gmail.com** with copy to sasha@highpointyachting.com **by 31st of January 2023**. Should you not have the final crew numbers please complete the form anyway with your best estimate of crew and return it by 31.01.2023 and then update and send it asap afterwards.

Find a boat / find a crew

If you are looking for crew to complete your boat or are willing to take additional people on board, please contact us directly via ecc2023.commodore@gmail.com. The other way is possible too: if you are looking for a boat or if you know somebody who would like to join the event but have no available berth, send a message to us. We will help to find the match among them.

Team pictures and Logbook

Even though we will use the Superevent App, we will prepare the classic ECC logbook which will be distributed in electronic form only (pdf file) and will include a team picture of each competing yacht. So, we are looking forward to receiving **a photo of your crew, possibly by 31st of January 2023**.

28th Engineering Challenge Cup 2023

Sponsorship

We are still looking for sponsorship, we are close to secure the financial support to have the welcome and prize giving parties in very nice place where the fun part and the socialization among all crews will be our main goals.

All the skippers have been contacted directly and some are still working to find resources available among their personal and professional contacts, we know it is not an easy and pleasant job but please keep on trying.

The [Sponsorship Presentation](#) is available on the www.eccsailing with the description of the sponsor opportunities and all the details about the 3 predefined packages. The OC is obviously ready to offer further support and information.

Many thanks to our sponsors which have already committed to support the ECC 2023 event!
