

ENGINEERING CHALLENGE CUP 2025 BULLETIN 07

Route update and sponsors team (*Labor omnia vincit*)

Dear ECC Skippers,

Last Bulletin's sub-title was Plautus's statement "*Ubi amici, ibidem opes*" (*Where there are friends, there are riches*) because we wanted to celebrate the Value of ECC community (*amici*). During the last weeks we have been building the ECC 2025 Sponsors team, that has responded to our call with the willingness to contribute to ECC 2025 success confirming that true wealth (*opes*) lies in the relationship we have with others.

Superevent app

Superevent app is now ready to go. You can access using the access code received via e-mail from "ECC 2025 <messages@superevent.com>" and your credentials. Please do not forget to load your photo in the APP account.

In the APP you will find a lot of useful information and crew teams data. Since some crew pictures are still missing, please remember to provide your photos to complete the APP and log book

The APP will be continuously updated with new information. Stay tuned for more updates!

New Itinerary

When browsing the app, you will notice that we updated the ECC2025 program.

The renovation project in Poltu Quatu schedule became incompatible with our event.

Therefore, we worked out a new itinerary that will bring us to one of the most exclusive ports in Costa Smeralda: Porto Rotondo

Moreover, we the first regatta will bring us to Tavolara, and for the dinner and the night we will anchor in Porto taverna bay

The new itinerary is: Portisco – Tavolara/Porto Taverna -Porto Rotondo - Porto Massimo - La Maddalena - Porto Cervo – Portisco

Please see the “preliminary Route” and “preliminary event agenda” section in the app for all the details.

ECC 30 in 25

We will celebrate the 30th edition of ECC during our week in Costa Smeralda, and we kindly ask you to do 2 things

- 1) Bring with you the oldest ECC-related object you own (T-shirt, admiral hat, medal, etc..)
- 2) Send us the pictures you want to share from previous editions. (only if OK to share with everybody, not the ones that shouldn't...)

Approaching Sardinia

Among our sponsors, you will find two local resources:

- Gustocambusa: an easy way to order your groceries at a competitive price. We tested their services during the recce trip. They are also quick to respond via WhatsApp if you need them. The goods can be ordered via their website and will be delivered directly to your boat (**see details in the app**). Gustocambusa will sponsor our welcome drinks at the Welcome Party and our bread for two mornings where there is no available supermarket. Please support this partnership by timely provisioning on line with Gustocambusa.
- Surrau winery is sponsoring our welcome drinks at the Prizegiving party and will sponsor some of the prizes too. Most of you will remember their excellent wine from previous events. If you arrive on Friday you can enjoy a nice evening of wine tasting

with the local finger food in their wonderful winery near Portisco (see details in the app). They will also offer wine at a discounted rate.

Fleet and charters

Please check your mailbox to be sure you did not miss any message from OC@ecc2025.it or HPY about Charter, Crew list, pictures, participation fees, etc.

In particular, we are missing some crew pictures. Please send them NOW, because we need to close the Logbook!

Sponsors Team

2025 edition of Engineering Challenge Cup can take place thanks to the contribution and the inspiration of our sponsors.

The sponsorship opportunity has been shared with a selection of players of the Engineering Value Chain. They are partners of the business community we are proud to live in.

ECC 2025 Organization Committee received from each of them a warm support and a factual contribution in designing another unique event.

By the way, we were offered 100.000 \$ by Nautimusk to become our “stellar” sponsor, but we declined because ECC is ONLY for *amici*.

Platinum sponsors

<https://www.groupmaire.com/en>

We play a key role by leading the energy transition with a synergic combination of technological innovation and hands-on implementation.

Reon AG

<https://www.reon-ag.com/>

We shape the future of tomorrow. Already 20 years ago we understood our responsibility towards a livable environment. With partnership and expertise, we develop, plan and build energy solutions in the fields of wind, sun and electromobility.

CO&M GROUP

<https://www.linkedin.com/company/co-et-m-group>

We are a dynamic and leading company specializing in services of project management, coordination of pre-commissioning, commissioning, and O&M for the Oil & Gas industry and broader energy, heavy industry, and marine sectors.

Our group was founded more than ten years ago with a deep understanding of the rapidly changing landscape of the Oil and Gas and Energy sector.

Our unwavering commitment to safety, environmental stewardship, and operational excellence. We adhere to the highest industry standards and regulations, ensuring every project is executed precisely and carefully

Deugro

<https://deugro.com/>

deugro is a highly specialized project freight forwarder with a strong focus on turnkey

logistics solutions for various industries. We have a proven track record in successfully executing projects of any magnitude, even under the most challenging conditions and requirements.

deugro is actively involved in working with clients to deliver value-added logistics solutions, especially for low-carbon projects, to support an immediate and profound strategic transition to sustainable energy sources.

Thanks to a vast network of more than 70 company-owned offices in over 40 countries, deugro leverages comprehensive and in-depth expertise around the world to deliver on its promise. Clients benefit from global coverage and local expertise at every major industrial hub.

TECTUBI RACCORDI S.p.A.

[Welcome to Tectubi Raccordi](#)

For over half a century the company has been collaborating with the most important EPC companies, offering its products at the highest quality and manufacturing standards. Its workers' craftsmanship and experience and its technical service is key to meeting any client's request in terms of materials, design and international specifications

Gold sponsors

Belleli Energy

<https://www.belleli.it/it/company/>

Belleli is committed to provide customized and technologically advanced solutions to customers, in relation to the design and operation of process equipment and on the project implementation timing, generating a positive impact for people and for the environment.

RF Technology Solution

<https://www.rf-technologysolutions.com/>

RF Technology Solutions Nigeria Limited (RFTS) specializes in providing various Nondestructive testing (NDT), Inspection and Heat treatment solutions to the Oil, Gas, Petrochemical, Power, and Construction sectors

Silver sponsors

DDM

Technical Sponsors

Gustocambusa YACHTING GROUP

<https://www.yachtinggroup.it>

<https://www.gustocambusa.com/>

Gustocambusa is a practical and innovative galley supply service with delivery directly on board at no additional cost.

SURRAU

SURRAU

<https://www.vignesurrau.it/home.html>

SURRAU winery is a second time sponsor of the ECC regatta.

The winery is based in the heart of Gallura, where the world-famous Costa Smeralda unfolds all its fascination, winemaking tradition and innovation. This is a modern winery and gallery that produces around 100,000 bottles a year. The setting is beautiful and offers an excellent opportunity for winetasting in a sophisticated and relaxing environment.

Event partners and sponsors

HIGH POINT YACHTING

High Point Yachting

<https://www.highpointyachting.com/>

High Point Yachting is a yacht charter broker with 25 years of experience in the yachting industry. High Point Yachting sponsored the Superevent App for ECC 2025.

‘We see the world offering endless possibilities, because after all, everyone’s definition of a holiday is different. For us, our objective will always be about looking beyond a destination to the real-world interactions, the memorable moments to be had and how we make people feel while experiencing it all. Our knowledge of destinations, yachts and crews is a treasure trove. It means we know and can access those paths off the beaten track that are full of magic and can be transformative. The beauty of a crewed yacht charter is the freedom it gives—you can stick to well-known routes such as the Cyclades Islands in Greece or leave to explore lesser-known regions (Antarctica, Papua New Guinea, and more), as much as you like. Routes are tailored to create the sort of experiences that stir the heart and give you memories and stories to keep for life.’

Superevent

<https://superevent.com>

The all-in-one event platform to publish apps for your in-person, virtual, and hybrid professional events.

WaterSportMarks

Watersportmarks

<https://www.watersportmarks.com/>

WaterSportMark is a robotic buoy. It is very light, compact, simple to use and designed to easily handle regattas and other events on the water. EzyMark is a small catamaran with 2 electric motors under each hull. On top a large colorful flag makes it very visible, while the underneath counterweight ensures stability. The onboard computer controls harmoniously and precisely the position.

WaterSportMarks is providing robotic buoys for the ECC 2025 regatta.
